## SYSTEMATIC FINANCIAL PLANNING STORY

### THERE ARE IMPORTANT FINANCIAL GOALS IN LIFE

1. Child's Education
2. Child's Marriage
3. Your Own Retirement

### INFLATION EATS MONEY DAY BY DAY

Compares the prices of MILK,PETROL,DIESEL,GOLD FROM THE PERIOD OF 1990-2014

### VALUE OF MONEY

1990	100000	1995	65908	2003	33825	2014	13518
------	--------	------	-------	------	-------	------	-------

Reduced value of money @ 8% infation p.a.

### SYSTEMATIC INVESTMENT PLAN (SIP)

Systematic Investment Plan (SIP) is a tool that allows you to invest in mutual funds through small,periodic installments.

SIPs help you set aside a fixed amount every month for investments thus contributing towards your goals. For Investment purpose, we often wait to collect a large amount of money and investment it all at once. Through SIP you can start with smaller amount on a monthly basis and create wealth over the long term.

### INVEST REGULARLY + SYSTEMATICALLY

DISCIPLINED INVESTING THROUGH SYSTEMATIC INVESTMENT PLAN (SIPS)

- (1) Every investor dreams of buying at a low price and selling at a higher price. But, how does one know whether any given time is the right time to buy or sell? Many retail investors try to judge the market movements and end - up losing their money in the long term.
- (2) A more successful strategy is 'Rupee Cost Averaging' wherein you invest a fixed amount regularly. Thus you purchase more when the price are low and purchase less when prices are high. SIP investments takes advantage of this strategy.

Systematic investing has a compounding effect on your investments. In the long term, an investment as low as Rs. 5000/- per month swells **up into a huge corpus**. This can be best explained by the following table. The table shows advantages of starting early. If an investor **starts early**, even with **lower invested** amount he can create a large corpus.

Features	Mr Anil	Mr Navin
Starting Saving Age	25	45
Monthly Savings	5000	15000
Total Amount Invested	21 Lakhs	27 Lakhs
Savings Till 60Yrs Age	35 Yrs	15 Yrs
WEALTH AT 60 Yrs AGE	5.70 Crores	0.92 Crores

The table is merely an illustration to explain the benefit saving at an early age. Returns are assumed at 15% CAGR. Assumed that SIP investment are done regularly every month. No guarantee or assurance of return is being offered by any mutual fund. The actual result may vary from depicted results depending on scheme selected.

### POWER OF COMPOUNDING

**Albert Einstein** once noted that the most powerful force in the universe was the principle of compounding. In investing, this manifests itself through something called compound interest. Put in its simplest terms,the phrase compound interest means that you begin to earn interest income on your interest income, resulting in your money growing at an ever-accelerating rate.

### DO YOU KNOW?

At the Rate of 15% Compounding what will be the value of RS 1/-	After 5 years RS 2/-	After 10 years RS 4/-	After 15 years RS 8/-	After 30 years RS 64/-
---	----------------------	-----------------------	-----------------------	------------------------

Give maximum time to your investments to get most of power of compounding.

### EQUITY NOT RISKY IN LONG TERM PERFORMANCE OF SIP IN DIVERSIFIED EQUITY MF SCHEMES

There are 27 equity funds, which have completed 15 years, the average SIP return of 27 diversified equity funds is 19.34% over last 15 years. So someone who had started with SIP of R10,000 in January 1999, has accumulated Rs. 90.14 lacs as on 31st December 2013 (on an investment of Rs. 18 lacs over the 15 year period).

**SIP R10,000/- PER MONTH INVESTED Rs.18 Lacs**

**CURRENT VALUE Rs.90.14 LACS**

Reducing probability of loss with increased investment tenure

### NO NEGATIVE RETURN OBSERVED IN EQUITY FOR INVESTMENTS OF 12 YRS & ABOVE
